

LEONARDO'S LEGACY: Painting, Science & the Life of the Soul

with Lyn Hill Taylor

This teaching program is based on a unique method developed at Abbey Art Works where Da Vinci's own words, seen through modern science's knowledge of visual perception, has shown that we all have the tools to draw and paint successfully.

Students learn the importance of mindful preparation for the learning experience, the nature of the creative model, the path to "the flow," and how our brains teach us to paint.

Each class includes hands-on work, demonstrations, careful explanation and attention. Materials limited to charcoal and newsprint pad, five oil colors, canvas pad, palette knife, solvent and brush. Other materials supplied.

This course is for anyone who wants to paint for the first time; for those who always wanted to give it a try; for those who want a fresh start; and, yes, even for those who teach others.
